It is difficult for Govt to interfere in a matter like this. I think the Petrs may be asked to represent their case to the Dy C who has reported that a different place will be chosen & then appeal regularly if they are not satisfied.

Removal of the present Mahomedan burial ground at Chikmaga to Barehalli a village three miles distant

The Deputy Commissioner of the Kadur district issued orders to the muselmans of Chikmagalur to bury the dead bodies at Barehalli, from 2nd June. The Muselmans being dissatisfied, wired to Government stating that the present ground afford more space & is harmless from sanitary views" and requested that orders might be issued to the Deputy Commissioner to extend time till their petition of Government was disposed

Information having been called for on the three points noted above, the President reports as follows.

(1) The present burial ground for the Mahomedans is situated

above the Ramanahalli Branch Channel, and drains into it. As the water for the town supply is drawn from this channel after it passes the said burial ground, the water is liable to contamination as the Mahomedans often wash their dirty clothes in the channel after burying the dead bodies.

(2) The President does not believe the construction of a new tunnel to be feasible as the fall below the channel is insufficient and would not allow of water being drained as in the case of the Christian burial ground.

(3) The Christian Cemetery is to the west of the town near Hosamane. A masonry duct has been constructed to drain off the water, which passes below the channel. Therefore the objection in the case of the Mahamedan burial ground referred to above does not exist in this case.

A revised sketch is submitted by the President in which the positions of the (1) the existing burial ground for the Mahomedans, (2) the new site selected for them, and (3) the christian Cemetery are

To the 3rd Councillor.

The case does not
seem quite conclusive
enough on paper, as
perhaps it is on the spot
in favour of removing
the present burial ground.

The water supply chan-
nel seems to be on a
higher level than the
depth at which bodies
will be found — though
the difference can only
be a few feet, it seems,

to be perhaps greater in the case of the Christian burial ground. ~~In fact~~ The present burial ground does not reach to the sketch to reach the channel. A land marked N.W. separates it; and if necessary, the boundary line between the burial ground can be produced to the North so as to cut off the N. Western corner of the burial ground from it. With perhaps the exception of a piece of land to the north, the supply which may be made use of for a Cemetery within any reasonable distance of Londonderry is not sufficient for the purposes of a Cemetery at this time.

Christian burial from
which touches the chan-
nel shd be allowed to
remain while the ma-
terial which does
not touch it shd be
removed on the ground
of contamination. I
think an order some-
what on the above lines
aiming at a compromise
should be passed But
at the same time, it
is a question whether
in a matter like this,
it would be advisable
to interfere with the
City Commissioners.

The matter does not
seem to have received
the case of the Mid
Ry Co. It is a true a
true bill which is now

Suitably be kept to be
decided by them.

ABSTRACT

The petitioners state that they have been prevented from burying their dead in the main burial ground, and from taking the coffins in the high road; that they have been ordered to bury their dead in a rocky place nearly three ~~miles~~ miles off from the town; that they have to take the coffins to the Mosque which by the side of the main road before removing them to the burial ground; that the Hindus

village - that this is injurious and
inconvenient to them in all ways
that it is also inconvenient to the
Mahomedan population since the
land is situated about 2½ miles
from the town - that moreover the
surface drainage water of the land
flows into the ponds at Hire-kere
that there is extensive land near the

Sir,

In reply to your docket no: 17448 for report dt 1-16-98 of the 26th June 1901, forwarding a copy of telegram received from the mussalmans of Chikmagalur, complaining against an order directing the burial of the dead at Barehalli, I have the honor to state that the burial ground now ordered to be closed is on the banks of the Ramanahalli channel in which it is believed that the corpses and clothes of the deceased are often washed, after which the water flows into the town and

and is used for drinking purposes. The Chemical Examiner to Government found the pipe water full of Cholera germs from this cause a short time ago. The present burial ground also abuts the new Extension of the town. It is proposed to move the burial ground about half a mile further on to a suitable site.

2. As directed in your telegram of the 26th instant, the order has been held in abeyance.

I have the honor to be,
Sir,

Sir,

In submitting herewith a sketch shewing the present and proposed burial grounds of the Muhammadan community at Chikmagalur with the distances clearly marked, as desired in your docket No. 3089 L.9.16-98 of the 20th August 1901, I have the honor to state that the leading members of the Muhammadan Community were requested by a written notice to attend the Municipal meeting at

at Chitrangalur on the 27th August 1901, in view to discuss the matter and to select a suitable site in lieu of the one now proposed to be closed. The notice was addressed to and served upon Mandé Patel Ganjam Abdul Khader Saib, a leading and an influential member of the community, on the 25th idem, and he among others did not attend the meeting but sent a letter of excuse for their absence to the effect that a general meeting which they had intended to call on the 25th idem had to be postponed on account of rains that day, and that the final opinion of the community would be communicated later on.

2. Thereupon one Mahomed Ali, a pleader

being present at the Municipal meeting was requested to call a muster of the Muhamadans, to discuss the matter and communicate their opinions early. A meeting was convened, accordingly, on Friday the 30th. August 1901 where it was resolved that a major portion of the present burial ground being still vacant, may kindly be allowed to stand as such and that also a parallel and contour tunnel may be constructed in order to avoid contamination of the water flowing in the Ramandalli channel.

3. This decision of the Mahomedans did not commend itself in my opinion, as the present burial ground had been pronounced insanitary

Vide

(Vide my letter no: 779 of the 30th June. 1901), and the Mukhomiadans were again requested, through Mr Mahomed Ali, to select a suitable site themselves with the condition that failing this opportunity, another site would be found for them and the present one closed. Even at this opportunity the Muhomadan community did not come forward and select a suitable site for themselves, but repeated their only prayer about their present burial ground being allowed to continue.

4. In spite of many opportunities afforded to them, their only reply is as stated above. This must, in my opinion, be taken as tantamount to a refusal to point out any other place.

the present burial ground, situated as will be seen, adjacent to Ramana-halli channel which carries drinking water to Chikmunglur for some months in the year during which the water-supply reservoir is dried up. Here, in the channel, they often wash their dirty clothes & thereby contaminating water. It also abuts the new extension of the town as it is in close proximity to inhabited locality

6. No. II is the now proposed burial ground at a distance of 1 mile & 152 yards from the junction of Kadur-Mangalore and Santaveri Roads (marked in red-pencil in the sketch) and 6 furlongs from No. I.

2 Records
Plan

No. III is also another proposed burial ground at a distance of 1 mile 3 furlongs and 30 yards from the said junction. This was proposed consi-dering also the Muhammadan popu-lation resident at Dantarmakki, a village on the other side of the Basa-nahalli tank.

8. In conclusion I beg to solicit the final orders of Govern-ment in the matter.

9. Correspondence relating to the subject is herein enclosed for reference and obliging return.

Sir,

In retransmitting the tracing, received with your docket No. 74 64 of the 14th instant, I have the honor to submit herewith a revised sketch of the Chikmagalur Town shewing the positions of the present and proposed Mahomedan burial grounds and also of the Christian Cemetery marked therein. The present Mahomedan burial ground is above the Ramanhalli branch channel and drains into it As the water for the town supply is drawn

from

from this channel after it passes the Mahomedan burial ground, the water is liable to contamination as the Mahomedans often wash their dirty clothes in the channel after burying dead bodies.

2 As regards the 2nd point, viz, what would be the effect of constructing a new tunnel and who would bear the cost of constructing the same, I beg to state that I do not believe this to be feasible as the fall below the channel is insufficient and would not allow of drainage as in the case of the Christian burial ground

3. The Christian Cemetery (marked no III) in the enclosed sketch is to the west of the town near Hosannas. A masonry duct has been constructed to carry off the drainage which passes below the Channel. The same objection does not therefore exist.

I have the honor to be,

Sir,

To

H. V. Manjundayya Esq. M.A, M.L,

Secretary to the Government of Mysore,

No 4647 General & Revenue Deptts:Bangalore.

Dated 18th March 1902

Sir,

In accordance with the request of Government contained in their Proceedings & Order thereon No. 11735-36 / 27-16-98 dated 16-1-02 I have the honor to state that I visited Chickmuglur on the 9th and inspected the Mahomedan burial ground which, it is proposed to remove, and I have no hesitation whatever in saying that there is absolutely no necessity for its removal.

2. The danger of a burial ground in the neighbourhood of a water supply is that, it is liable to pollution by sub soil unfiltration, and if the Ramanhally channel which flows below and at no great distance from the burial ground, were the only source from which the water supply of the town was derived, and if no other source of contamination were present, I should then be the first to recommend the removal of the burial ground.

3. The Ramanhally channel is however, only an irrigation channel and its water is only used for about 2 months in the year to supplant the pure water supply of the town, the capacity of which, owing to several causes is insufficient to meet the requirements of the town for the whole year. This channel is a perennial stream running on the outskirts of the town and is some 5 miles long, and throughout its whole course it is liable to contamination by man and beast, and to remove the burial ground, which after all, is only a remote source of danger and leave the Ramanhally channel would be simply folly. What is really required, and it has been forcibly pointed out both by the Officiating Senior Surgeon and the Government Bacteriologist,

Bacteriologist.

4. That the town of Chickmuglur should not be dependent upon the Ramanhally channel during any portion of the year, and the only way to do this is to enlarge the reservoirs until they are capable of holding a full years supply of water, and this should in my opinion be seen to at once.

5. I may add that I inspected the filter beds & found them to be in the state of sad neglect. The sand employed as a filtering medium is now nothing more than mud, and I was told that it has never once been removed or cleaned since the day the filter beds were first opened in 1893.

6. It is in my opinion quite time that Sanitary Boards were formed in all districts, whose duty it would be to see that water supplies &c in outlying towns in their districts were properly supervised, and who would at once bring to the notice of the Central Sanitary Board anything that was wrong, as it is impossible to expect Deputy Commissioners of Districts to be responsible for everything.

I have the honor to be,

Sir,

Your most obedient servant

Lt.Col.I.M.S.

Senior Surgeon and Sanitary Commissioner

Mysore Government.

Read:-No. 4647.

Correspondence ending with letter No.4647 dated 18th March 1902 from the Senior Surgeon and Sanitary Commissioner with the Government of Mysore, stating that there is absolutely no necessity for the removal of the Mahomedan burial ground at Chikmagalur from its present position, as it is only a remote source of danger to the Ramanhalli Channel, which is not the only source of water supply to the town of Chikmagalur.

Order thereon No

Government agree with the Sanitary Commissioner and direct that the order of the Deputy Commissioner of Kadur for the removal of the Mahomedan burial ground from its present position be cancelled.

2. The attention of the Chief Engineer & the President is drawn to para 5 of the Sanitary Commissioner's letter and he is requested to see that the omission therein rightly pointed out is rectified at once. There is more mud than sand in the filtered and this is unsatisfactory.

3. Some 200 acres of wetland appear

dependant upon the Ramanhalli Channel ~~r~~ have within the past few years been acquired for town extension and thus thrown out of cultivation. About 200 units of water from this source could therefore be diverted to the Water Supply Reservoir On this point the Chief Engineer's proposals will be invited.
